Hurricane Impact Protection

Protect your home with the finest Hurricane Rolling Shutters available on the market today.

Our Shutters are Designed for 150mph + Conditions

If you live in an area where hurricanes and tropical storms threaten, you already understand the need to protect your windows and doors from the fury of Mother Nature. At Empire we understand the frustration that can go along with storm preparations. Our Rolling Shutters offer you the easiest and safest way to protect your home or business without worry. When it comes to safeguarding your most valuable possessions, our Rolling Shutters can give you the peace of mind you need at the most competitive prices.

Once deployed, our rolling shutters will keep out high winds, driving rain, and flying debris that can break your windows and cause water damage or even catastrophic structural failure.

Why Use Our Shutters?

We use powder coated, heavy duty aluminum extrusions and high quality components to ensure you are getting a product that will stand the test of time. Available in manual or motorized, our Rolling Shutters can be integrated with most home automation systems.

Every Empire Rolling Shutter has been engineered to meet the most stringent building codes as set forth by the International Building Code, Texas Department of Insurance, and the Florida Building Code's High Velocity Hurricane Zone.

Building Security

Our Rolling Shutters secure vital areas that are susceptible to entry by force. Doors and windows benefit from the application of our security rolling shutters.

Your Doors and Windows are the Most Vulnerable Area of Your Home

According to FBI crime statistics 66% of all burglaries are committed on residential dwellings. 50% of all break-ins take place during the day. There is a close correlation between increased crime and unemployment rates. In times of rising unemployment, burglaries will also rise.

Just under 79% of intrusions happen through windows or doors. Securing these areas should be top priority in break-in prevention.

Did You Know?

Our Shutters can be locked with a slide bolt locking mechanism, or guide rail bullet locks that require a key. We also manufacture an End-Retention Rolling Shutter. Our end retention system increases security even more by putting retention slat locks on the ends of the shutter curtain. These slat locks lock into the guide rail making it all but impossible to penetrate.

Security Shutter Overview

- High Strength Aluminum Extrusions
- Visual Deterrent
- Unobtrusive Design
- Anti-Theft Locks
- End-Retention Slat Locks
- Manual or Motorized operation
- Key Switch or Remote Control
- Timers for automated operation

Energy Efficiency & Climate Control

The world around us continues to produce more sensory and environmental pollution. Imagine the peacefulness of your interior if you could block all of that out.

Energy Efficiency All Year Round

Rolling Shutters insulate your windows against energy transfer saving you money throughout the year. When deployed they create a pocket of air between the shutter and the window. Our shutters give you the opportunity to control the shade and temperature inside the room, making for a more comfortable living or working environment.

Additional Energy Saving Features

- **Light Control**
- **U.V. Protection**
- **Noise Reduction**
- **Increases window solar heat gain coefficient up to 92%**
- **Improves window U-value by 48%**
- **Prevents fading of drapes, furniture, carpet, fabrics, and artwork.**
